

LOW FIDELITY SKETCHES

Purpose of the Low-Fidelity Sketches

- To see the design of the application before committing time to development.
- To rapidly test layout concepts with stakeholders or users.
- To ensure that the navigation flow is logical.
- To avoid spending time on high-fidelity design by identifying errors early.

Login page

The login page includes:

The logo

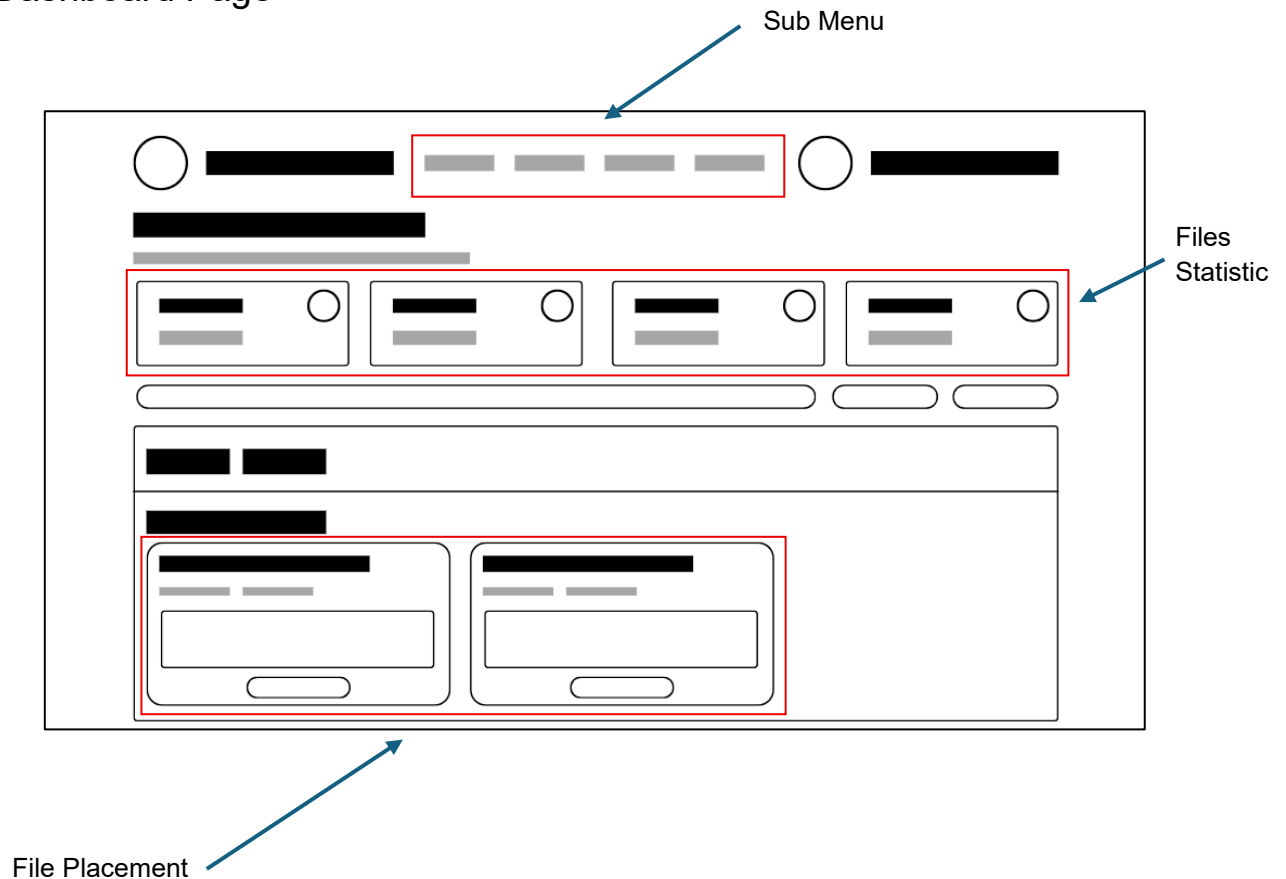

Input fields (password, email)

Click "Submit."

Objective:

- It offers a safe way to access the system.
- Users are guaranteed to concentrate just on the necessary information thanks to the layout's simplicity.
- Putting the logo there strengthens trust and brand identity.
- The page is kept clear and easy to read by using few elements.

Dashboard Page

What this page accomplishes:

It serves as the main control panel from which users may view a snapshot of all activities.

The reason it exists:

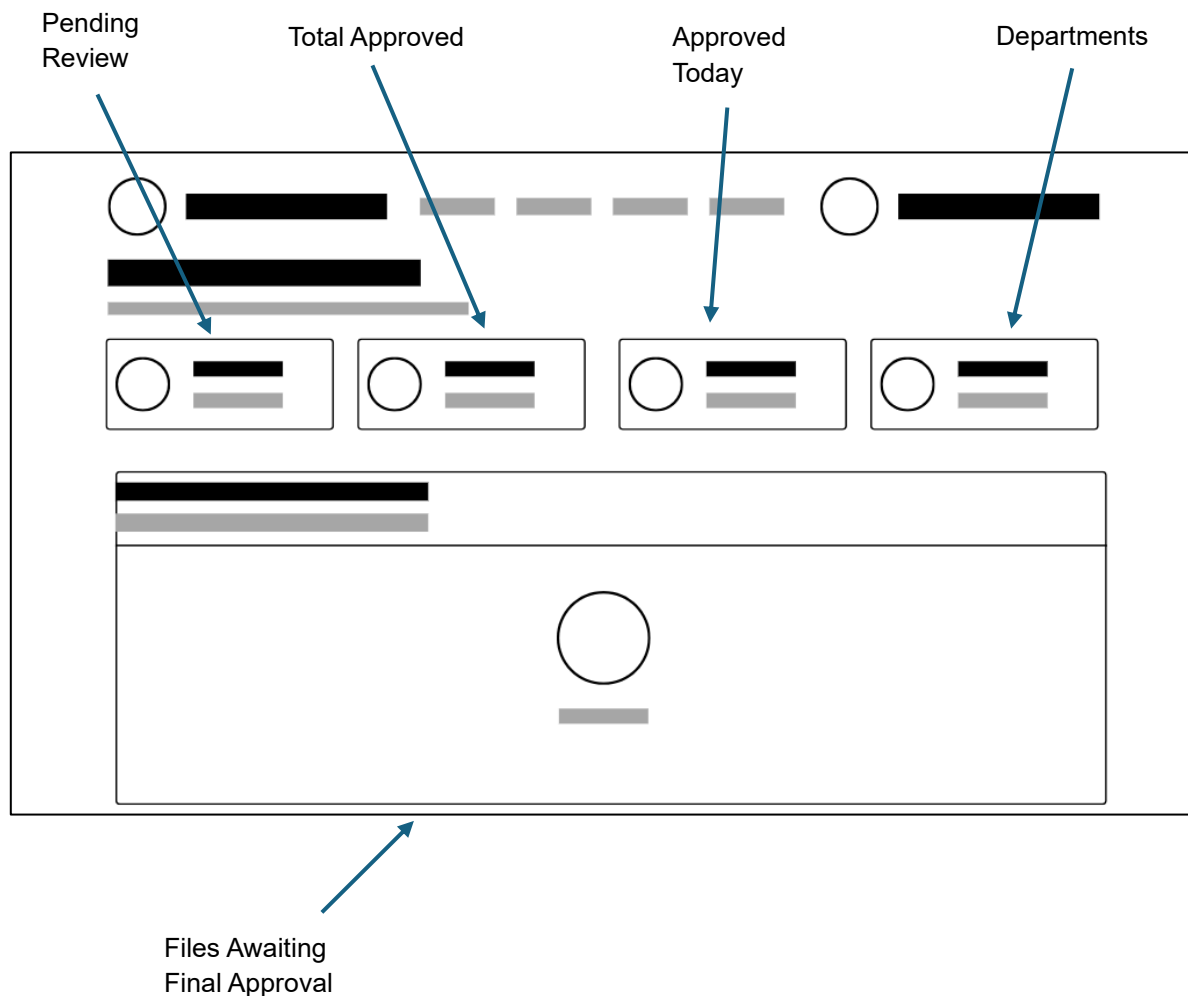

Users must have rapid access to crucial information such as:

- Pending documents
- Authorised files
- Overall approvals
- Departmental classifications
- Using a dashboard saves time spent navigating menus.

Purpose of its design:

- Segmented boxes facilitate the grouping of related data.
- Briefly, users may quickly comprehend system activity.
- Important statistics are given priority at the top of the page because this area receives the greatest attention.

Files Review

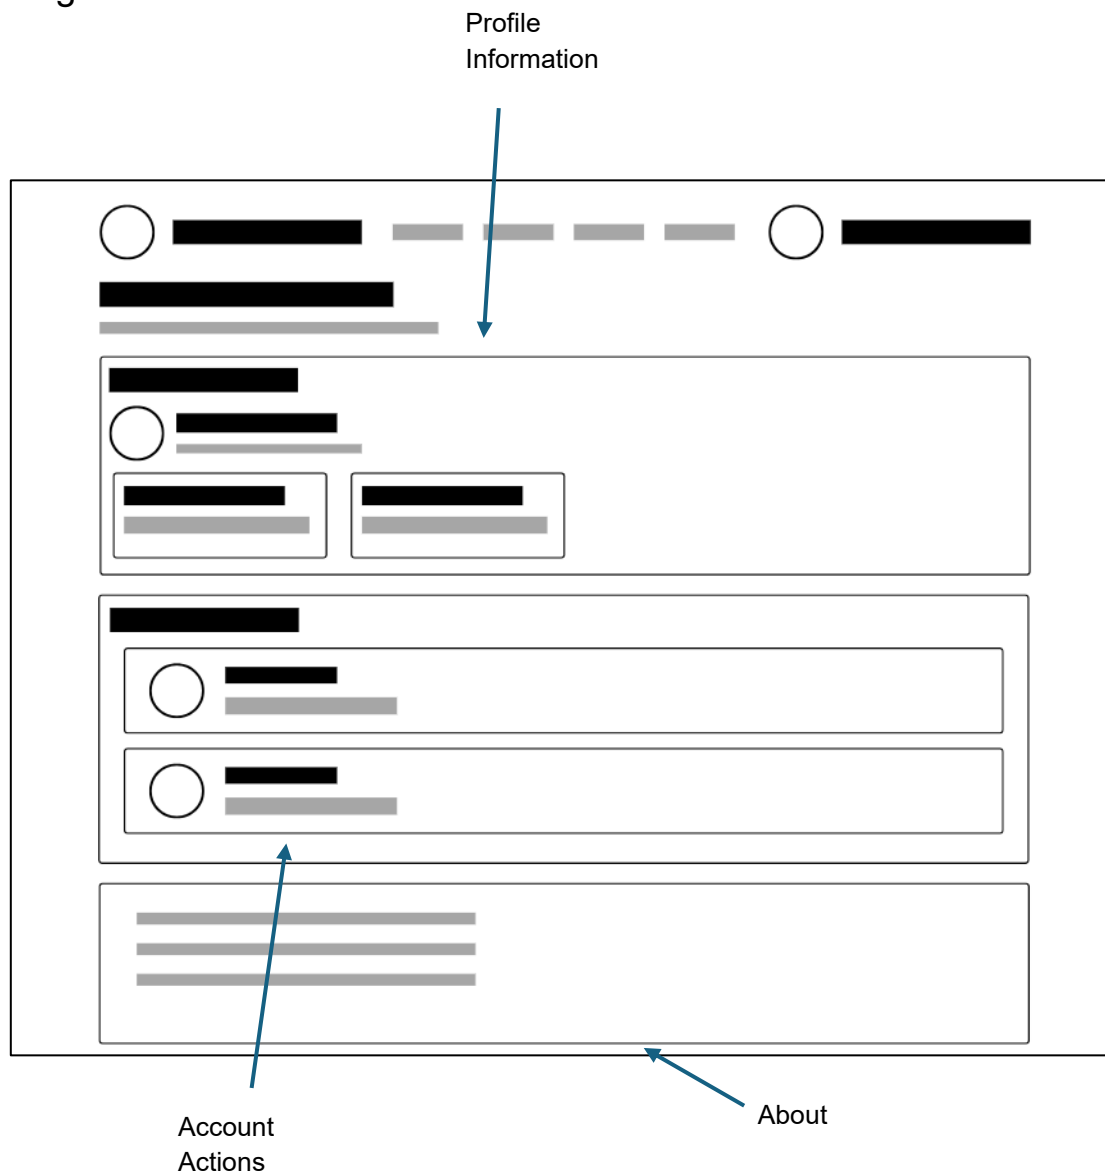

Included in this section are:

- Awaiting review
- Departments
- Approved today
- Total approved
- Files awaiting final approval

Why this matters:

- Aids users in monitoring document workflow progress.
- The system is clearer when states (pending, approved, awaiting final approval) are kept apart.
- It facilitates decision-making by displaying workload and bottlenecks in an understandable manner.

Settings

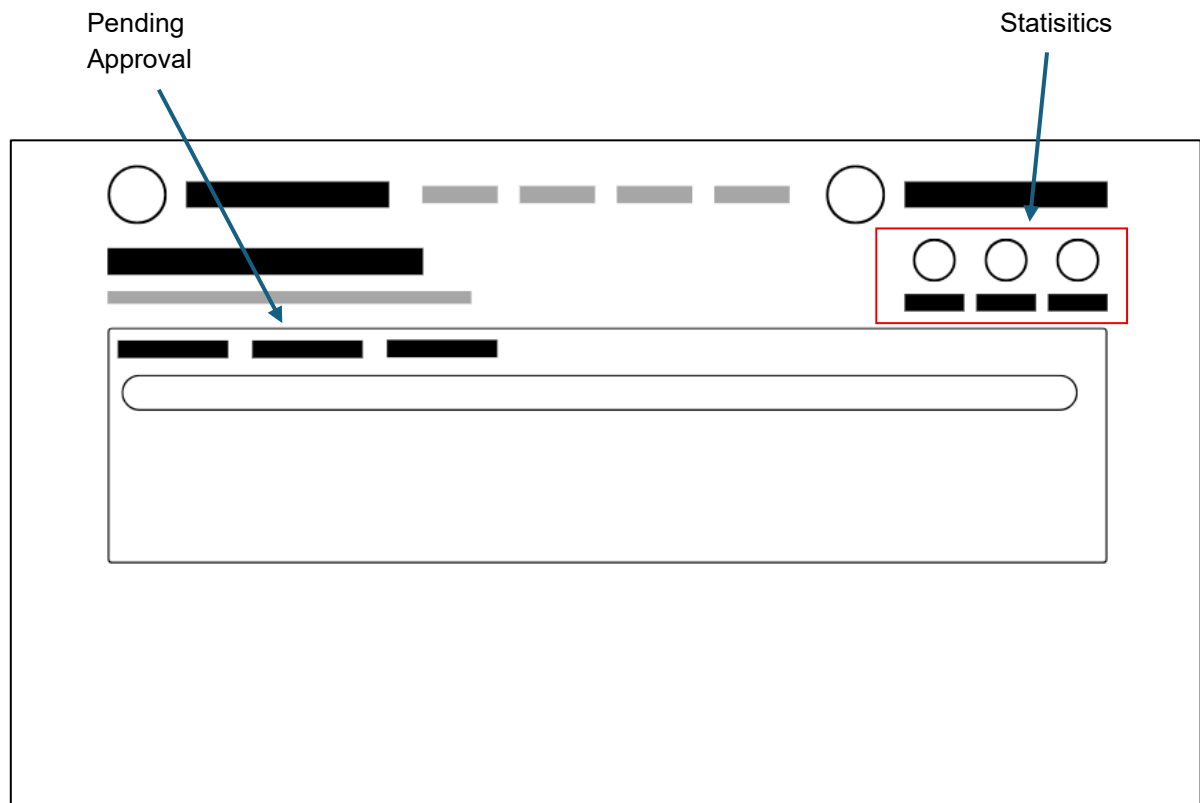

Includes:

- Profile Information
- About
- Account Actions

The functionality:

- This page centralizes user-level configurations, essential for personalization and system maintenance.
- Profile Information allows users to **update their details**.
- Account Actions include things like reset password or log out.
- The About section gives system info or meta-details.

Admin Page

Contains:

- Pending approval
- Statistics

What this represents:

- A dedicated interface for administrators to oversee operations.
- Admins need a higher-level view, so stats and pending approvals dominate this page.

Why it matters:

- Keeps administrative tasks separate from regular user tasks.
- Supports system governance, accountability, and efficiency.
